# Setting\_Up\_a\_Database\_for\_C3PR

# **Summary**

This article discusses how to set up a database when installing C3PR.

# **Keywords**

- C3PR
- Database
- Oracle 10g

### **Products Affected**

C3PR

# **Details**

# Q:

I have a question about the database creation step when trying to install C3PRv2 manually on an RHEL server, using a backend Oracle 10g database. The C3PRv2 Installation Guide states that the 'createOrUpdateDatabase' target in codebase/antfiles/build.xml needs to be executed in order to set up the database, but no such target exists in the build file in iteration 4.

# A:

The Installation guide you are reading has not been updated since C3PRV2.5 has been released. We recommend that you upgrade to V2.5 using the graphical installer. The C3PRV2.5 Installation Guide is located at:
